

ABHILASH KUMAR

Software Engineer Transitioning to Data Science | Python | Machine Learning | Analytics
+91 70046 05633 | abhilashkumar213@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Bangalore, India

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience in Frontend Development and Python Backend Development, building scalable web applications, APIs, and data-driven solutions.

Hands-on experience in Machine Learning, NLP, Predictive Analytics, and Data Visualization through multiple end-to-end Data Science projects.

Seeking Data Science and Machine Learning opportunities where I can leverage strong software engineering fundamentals, analytical thinking, and data-driven problem-solving skills.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Libraries: Pandas, NumPy, Scikit-Learn

Data Analysis & Visualization: Matplotlib, Seaborn, Plotly, Power BI

Machine Learning: Random Forest, XGBoost, Logistic Regression, Linear Regression, Decision Trees

Data Science: EDA, Statistical Analysis, Data Cleaning, Feature Engineering, Model Evaluation, Model Deployment

Natural Language Processing: Text Pre-processing, TF-IDF, Spam Classification

Databases: MySQL, SQLite

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Power BI

Deployment: Streamlit, Dash

DATA SCIENCE PROJECTS

Customer Churn Prediction | Python, Pandas, Scikit-Learn, Random Forest, Dash, Plotly

GitHub: [Open in Github](#)

- Built a machine learning model to predict telecom customer churn using classification algorithms.
- Performed EDA, feature engineering and model evaluation.
- Built and evaluated Logistic Regression and Random Forest models (ROC-AUC = 0.84) and developed an interactive application for real-time churn prediction.

Email Spam Detection | Python, NLP, Scikit-Learn, TF-IDF, Dash, Plotly

Github: [Open in Github](#)

- Developed an NLP-based spam classification system using TF-IDF and machine learning techniques.
- Applied text pre-processing and feature extraction to improve classification performance.
- Built a user-friendly interface for email prediction with 99.92% ROC-AUC score.

Netflix Recommendation System | Python, Pandas, TF-IDF, Scikit-Learn, Streamlit

GitHub: [Open in Github](#)

- Built a content-based recommendation system to suggest relevant movies and TV shows.
- Performed data pre-processing and similarity analysis for personalized recommendations.
- Improved content discovery through personalized recommendation techniques based on content similarity.

India Covid-19 Analytics Dashboard | Python, Pandas, NumPy, Scikit-Learn, XGBoost, Dash

GitHub: [Open in Github](#)

- Developed an end-to-end COVID-19 analytics platform using Python, XGBoost, Dash, and Plotly for trend analysis and forecasting.
- Build and evaluated Random Forest and XGBoost models ($R^2 = 0.98$) and developed an interactive dashboard for visualization and future case prediction.

Student Score Prediction | Python, Pandas, EDA, Scikit-Learn, XGBoost

Github: [Open in Github](#)

- Developed a regression model to predict student academic performance.
- Conducted data cleaning, feature engineering, and exploratory data analysis.
- Build and evaluated Random Forest and XGBoost models ($R^2 = 0.76$) and deployed the model using Streamlit.

EXPERIENCE

HCL Technologies | Python Backend Developer

Feb 2022 – Oct 2025

- Developed and maintained Python backend services and REST APIs using FastAPI for enterprise-scale applications.
- Performed SQL optimization, ETL validation, and automation workflows, improving data processing efficiency and reliability.
- Collaborated with cross-functional teams to deliver scalable enterprise applications and data-driven solutions.

Ariespro Technology Services | Frontend Developer

Jun 2021 – Jan 2022

- Developed responsive web interfaces using HTML, CSS, JavaScript, and Python.
- Collaborated with backend teams to integrate APIs and enhance application functionality.
- Delivered user-friendly and visually appealing web solutions for client projects.

Adequate Infosoft | Frontend Developer

Apr 2020 – May 2021

- Developed and maintained company websites and web applications.
- Designed marketing materials and UI components using Photoshop and web technologies.
- Worked closely with stakeholders to implement business requirements efficiently.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering
University Institute of Technology, Burdwan | 2014 – 2018 | 72.6%

CERTIFICATIONS

- Data Science Certification – Internshala (2025)
Data Analytics, SQL, Power BI, Python, Machine Learning, NLP, Deep Learning
- Programming With Python – Internshala (2019)
Python Programming

ACHIEVEMENTS

- NPTEL Gold Medal Certification in Algorithms
- Secured AIR 8474 in GATE 2019
