CAREER OBJECTIVE

Aspiring Data Scientist with a passion for extracting valuable insights from complex datasets. Proficient in data analysis, Python, Excel, Power BI, MySQL, machine learning and statistical modeling. Dedicated to driving data-driven decision-making and delivering impactful solutions.

WORK EXPERIENCE

Backend Developer

Jan 2022 - Oct 2025

hcl, Bengaluru

- **IKEA:** Working as a Python Backend Developer for writing code, debugging, testing and optimizing the back-end components to ensure functionality and performance using technologies like Python, FASTAPI, pandas, numpy, Firestore DB and Postman.
- **Nestle:** Worked as Python Developer and have written many scripts to interact with Microsoft Purview using Rest APIs and Pandas.
- **ANZ:** Served as ETL Developer and Tester, handling data validation, SQL query optimization and System Integration Testing (SIT).

Front End Developer

Jun 2021 - Jan 2022

Ariespro Technology Services, Chandigarh

- Worked as Front-End Developer.
- Design and Develop responsive interfaces using HTML, CSS and JavaScript.
- Worked with the Backend team also using Python.

Front End Developer

Apr 2020 - May 2021

Adequate Infosoft, Noida

- Developed Company Websites and designed market materials using Photoshop.
- Collaborated closely with backend teams to ensure visually appealing and functional designs using HTML, CSS, Javascript and Python.

EDUCATION

Bachelor of Engineering (B.E), Computer Science & Engineering

2014 - 2018

University Institute Of Technology, Burdwan

Percentage: 72.60%

Senior Secondary (XII), State Board

2012

Science

A.n.s. College, Barh

Percentage: 75.00%

Secondary (X), CBSE

2009

S.V.M Aurngabad

Percentage: 85.20%

TRAININGS / CERTIFICATIONS

Data Science

Jul 2025 - Dec 2025

Internshala, Virtual

- Introduction to Data Analytics
- Data Management and Analysis with MS Excel
- Data Visualization (Power BI)
- Python for Data Analysis
- SQL for Data Analysis
- Machine Learning Fundamentals
- Natural Language Processing
- Deep Learning

Programming With Python

Jan 2019 - Mar 2019

Internshala Trainings, Virtual

I learned about Python to an intermediate level

PORTFOLIO

[GitHub link ↗](#)

[HackerRank link ↗](#)

PROJECTS

[Smart Pricing & Retention: Data-Driven Solutions for Airbnb and Telecom Industries ↗](#)

Sep 2025 - Oct 2025

Predicting Airbnb Listing Prices-

- Collected and prepared data from Airbnb listings.
- Engineered new features to improve model accuracy and interpretability.
- Implemented regression techniques to predict property prices effectively.

Customer Churn Prediction in Telecom Industry-

- Built a classification model to predict customer churn using Logistic Regression, Decision Trees, and Random Forests.
- Evaluated model performance using metrics like Accuracy, Precision, and Recall.

[Student Score Prediction - ML ↗](#)

Oct 2025

I have built an ML model which predicts the score of a student based on his study habits or lifestyle factors. It includes:

1. Data creation with missing and noisy values.
2. Data Cleaning, Outlier Detection and deep EDA.
3. Feature Engineering and Scaling.
4. Model building with Linear Regression, Decision Tree, Random Forest and XGBoost.
5. Deployment using Streamlit for live score prediction.

[Walmart's Retail insights optimization ↗](#)

Aug 2025

SQL Sales Analysis: Growth trends, customer segmentation, product performance, anomaly detection, and insights on branches, spending tiers, repeat buyers, and payment preferences for strategic decisions.

[Text Intelligence: Sentiment Analysis of IMDb Reviews and News Article Classification ↗](#)

Oct 2025

Sentiment Analysis of IMDb Movie Reviews: Performed sentiment analysis by preprocessing text data (tokenization, stopword removal, stemming), extracting features using TF-IDF and Word2Vec, and training classification models to predict review sentiment with high accuracy.

News Article Classification: Classified news articles into categories such as sports, politics, and technology by scraping and preprocessing text data, extracting features, and building machine learning models for accurate topic categorization.

[Electric Vehicles Market Size Analysis ↗](#)

Sep 2025

EV Data Analysis: Filtered data by budget and range, grouped by manufacturer, and analyzed battery-range relationships to uncover performance trends. Developed a Python-based EV recommender system, detected outliers, and conducted hypothesis testing (e.g., Tesla vs. Audi engine power) to derive strategic insights.

[Airline Performance Analysis using Power BI ↗](#)

Jul 2025

Airline Data Analysis: Cleaned & transformed data in Power Query, built DAX measures, designed interactive Power BI dashboards with slicers & drill-throughs for flight performance and customer insights.

SKILLS

- | | | |
|-----------------|------------------------|--------------------|
| • MySQL | • Python | • Machine Learning |
| • Data Analysis | • NumPy | • Pandas |
| • PowerBI | • Tensorflow | • Matplotlib |
| • Seaborn | • Statistical Modeling | • Problem Solving |

ADDITIONAL DETAILS

- Gold medal certified in the subject of Algorithm by NPTEL
- Participate in state level quiz competition.
- Secured 8474 rank in Graduate Aptitude Test for Engineering in 2019
